Arizona Report of Public Agency Performance on Preschool Placements

Indicator 6: Preschool Placements

Percent of children with IEPs aged 3-5 who received special education and related services in settings with typically developing peers.

Measurement

ADE/ESS extracts the data from SAIS using the service codes entered for students with disabilities by the public education agency (PEA) for the December 1 federal child count.

The measurement refers to children with disabilities aged 3-5 years, including children in kindergarten who are still aged 5 on December 1.

Data are not reported for a PEA when the PEA had fewer than 10 students with disabilities aged 3-5 enrolled on December 1, 2005. In these instances, the data are not reported to ensure confidentiality. Charter schools in Arizona do not serve preschool children, including preschool children with disabilities, as part of the public school contract; therefore any percentage reported for a charter school reflects only kindergarten 5-year-olds.

Explanation of Indicator

This indicator provides information about the extent to which PEAs include children with disabilities aged 3-5 in a learning environment with age appropriate typically developing peers. PEAs are required to offer a continuum of service options to meet the unique needs of each child; however, they are also required to educate students in the least restrictive environment to the maximum extent appropriate for each child.

Settings that are included in the calculation of the percentage include:

- Early childhood settings
- Home
- Part-time early childhood/part-time early childhood special education
- Reverse mainstream preschools with a 50/50 ratio of children with/without disabilities

All data are reported for the 2005-2006 school year.

State Target for SY 2005-2006: 48.0% of Arizona's 3-5 year olds served in settings with typically developing peers

State Average for SY 2005-2006: 45.9% of Arizona's 3-5 year olds were served in settings with typically developing peers
